

Aus3

Do the Aus3 in Your Classroom!

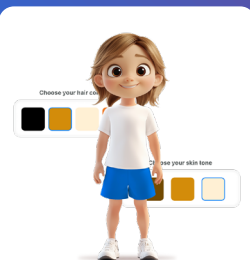

Aus3 is a free participation program for children aged 7–12 that combines physical activity with learning. Simply log any running, cycling, or swimming activities – or any other physical activity you choose. With each activity recorded, your class avatar takes another step along a journey through 70+ real locations across Australia, discovering elements of the nation's geography, history, flora and fauna, and culture along the way.

Why Choose Aus3?

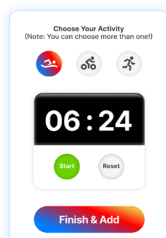

- Free to use, no school budget required
- Supports HPE, Geography, History, and Science outcomes for Years 1–6. Full curriculum guide available
- Motivates students with a gamified journey across Australia
- Works for running, cycling, swimming – or any physical activity.

It's fun, physical, and educational!

Children love discovering new locations and earning rewards.

1. Choose your character!

2. Record activity

3. Journey across Australia

Beyond the Classroom

Encourage parents to register a free Aus3 account for their child, enabling them to discover the journey in their own time and contribute to class discussions.

Access the Curriculum Guide

Discover alignment across key subject areas for your state or territory with a state-by-state mapping and easy lesson integration ideas.
